AI Patent Information Searches
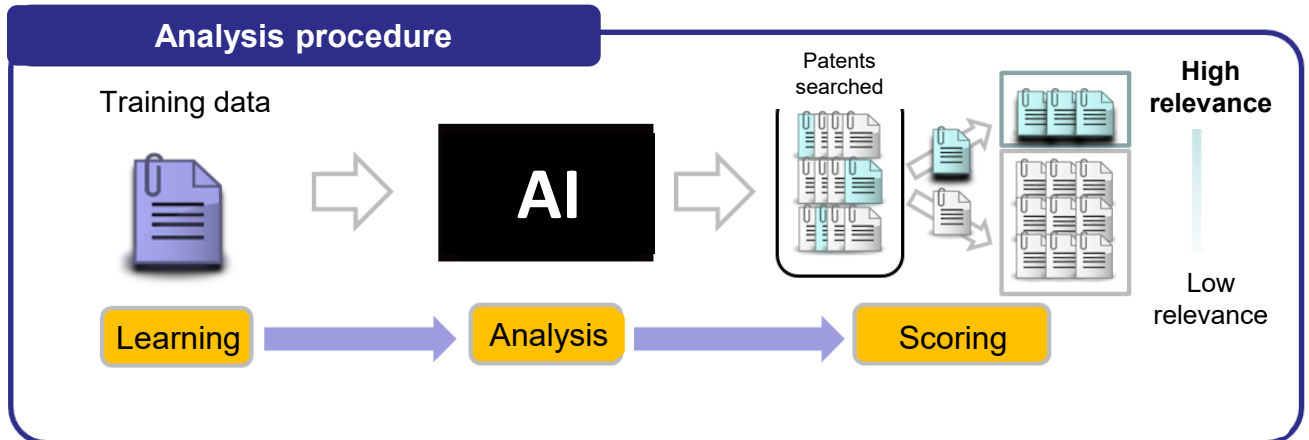

AI Patent Information Searches

Increase the speed and lower the cost of patent information searches with AI.
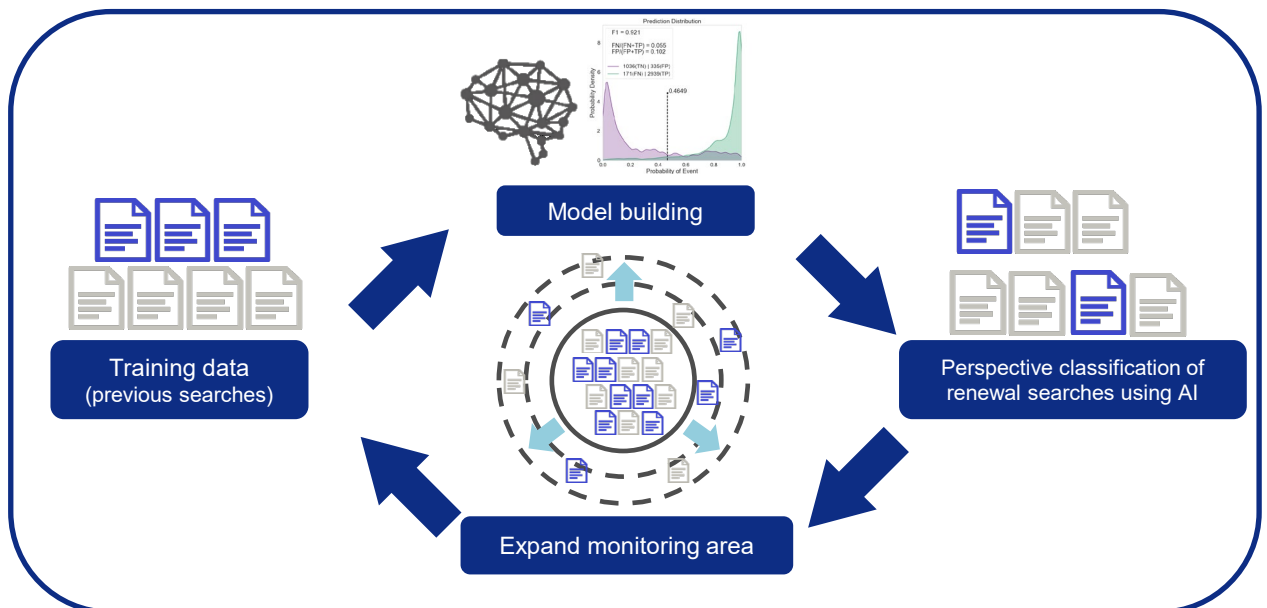

1 Patent invalidity searches using AI

We use AI to sort collections of patents by relevance and perform priority screening of high-scoring patents.

Analysis procedure

Training data → AI → Patents searched → High relevance / Low relevance

Learning → Analysis → Scoring

2 SDI and gathering patent information using AI

We use AI to build learning models and isolate noise based on the results of previous searches. Expand your search monitoring areas and discover unknown competitors.

Training data (previous searches)

Model building

Perspective classification of renewal searches using AI
