

Design

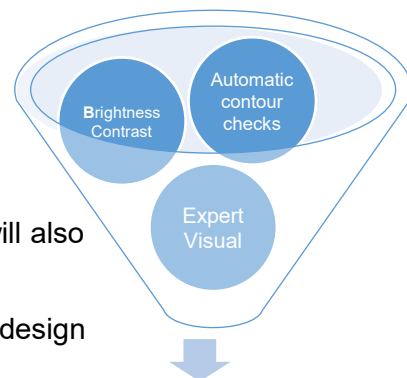

Global design applications with high-quality drawings and photographs

We check the drawings provided by your company for consistency mechanically using our unique automatic contour checking process.

In addition, our staff with extensive experience in design applications will also make manual visual checks.

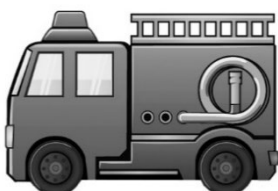

Brightness, contrast, and other adjustments can be optimized for each design application.

Partial processing of drawings is also available if necessary.

High quality design drawings

Before

Hose removal
Collage of holes

After

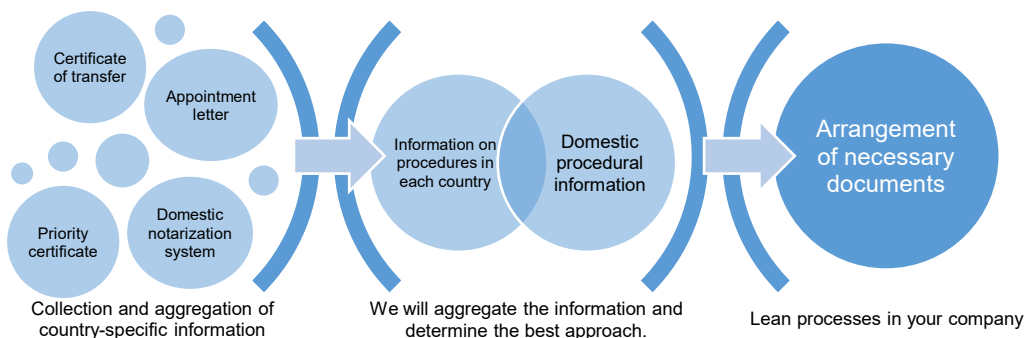

In addition to image processing like that shown above, we can also provide optimal drawings tailored to the practices of each country through close collaboration with local agents specializing in local applications.

We also support notarization and certification procedures in cooperation with law firms around the world!

We support complex procedures in cooperation with law firms all over the world!

We have extensive practical experience in Middle Eastern countries with particularly complex certification procedures.
