

Features of TTDC's Translation Services

1 Creating quality in partnership with our clients

By assigning a translator to each client, we are able to accurately understand the client's requirements and reflect them in the translation.

Propose optimal specifications according to the application route/purpose of use

Reflecting the latest information shared with clients in our services

Quick response to questions after delivery

2 Resolve your practical work issues.

We are constantly developing new services to help resolve inconveniences in your daily work.

1 Machine translation doesn't capture the nuances of important passages...

2 We just want to read a massive amount of foreign-language literature as fast as we can!

3 We want to know the difference between published and registered publications.

4 It's hard to read claims without reference numbers...

1 Face-to-face consultation service

Directly discuss the essence of foreign-language documents with our team. We will answer any questions you may have on the spot.

2 Simple post-editing (PE) service

We will make machine translations easier to understand. (German/Chinese/English to Japanese)

3 Difference display service

We will compare the original text and display the differences in the translated text.

4 Reference number assignment service

We will apply reference numbers to your claims during translation.

3 Quality control initiatives

At TTDC, our quality control initiatives are based on the principle of managing quality as an organization.

If a problem occurs, we do not stop at an individual response, but consider a system to prevent recurrence.

4 Complete confidentiality management system

We will handle your important information responsibly with our industry-leading confidentiality management system that conforms to Toyota standards.
